Filter entities

Choose entities to include in the dump. An entity is included if it matches at least one filter.

select ☒ items ☐ properties which match all of these conditions:

property

instance of

constraint

☒ exists ☐ has value

value

instance of (P31)

that class of which this subject is a particular example and member (subject typically an individual member with a proper name label); different from P279; using this property as a qualifier is deprecated—use P2868 or P3831 instead

subproperty of (P1647)

all resources related by this property are also related by that

Filter entities

Choose entities to include in the dump. An entity is included if it matches at least one filter.

select

☒ items ☐ properties

which match all of these conditions:

×

| property | constraint | value | |
|-----------------------------------|-------------------------------------------------------------------------|---------------------------------|-------------------------------------------------------------------------------------|
| <input type="text" value="P31"/> | <input type="radio"/> exists <input checked="" type="radio"/> has value | <input type="text" value="Q5"/> |  |
| <input type="text" value="P569"/> | <input checked="" type="radio"/> exists <input type="radio"/> has value | |  |
| <input type="text" value="P570"/> | <input checked="" type="radio"/> exists <input type="radio"/> has value | |  |

+ [Add condition](#)

Filter statements

Choose how statements are exported. These rules are applied to all matched entities.

Default rule

This rule is applied to all matched entities

Parts to export

simple statement

full statement

references

qualifiers
